Cadro
Creativity in the form of aluminium framing

Cadro is a practical interpretation of frame design. It is suitable for many residential and commercial applications, including kitchen islands, bathroom vanities, walk-in wardrobes, or retail fit-outs and hospitality.

- A narrow silhouette for a feeling of lightness, or an industrial style
- A stand-alone frame, or extension to traditional cabinetry
- A lightweight cabinetry base in black aluminium
- Furniture that can be wall mounted or floor standing with special fixtures
- Maximise visual impact with specialized LED lighting and glass panel enhancements

Hettich

CADRO
A frame system with creative freedom
for your residential & commercial space

With Cadro, Hettich brings its expertise in cabinetry fittings to expand the design potential of a classic aluminium frame. In a vogue matt black, Cadro has the potential to be everything but a standard cabinet. Compatible with glass shelving, panels, hinged doors, sliding and folding door fixtures and AvanTech YOU drawers.

The Cadro range is made up of various 16mm square profiles and 13 different nodes that connect these profiles at each corner. Between these parts, the frame shapes possible by Cadro are almost endless. Combined with its compatibility with side panels, shelving, and many of Hettich's other hardware fittings, it is a near complete, lightweight cabinetry system that can be managed within any cabinet maker's workshop.
