

EVISYS

Guiding hinge for integrated fridge doors

High load bearing performance for extravagant looking kitchen design.

Large surfaced design with floor to ceiling kitchen cabinetry and minimalist reveals: for many, this is the dream kitchen look. Yet the wider and taller the cabinet doors, the heavier they get. This calls for exceptional load bearing capacity. With the Evisys guiding hinge, Hettich provides a unique fitting solution for installing extra tall cabinet doors in front of built in refrigerators with fixed door connection.

Positioned in the top cabinet door section, Evisys ensures the necessary opening and closing stability and keeps reveals precisely aligned at all times.
