

# OUTDOOR RANGE

Specialised hardware for high exposure applications

Hettich's outdoor range is designed to withstand the tough climate. We use high-quality materials with advanced German engineering to ensure they can handle fluctuating temperatures and humidity. Don't miss out on the comforts of storage organisation, customisation and soft-closing functionality. It's living for everyone, everywhere.

# OUTDOOR RANGE

Stands the test of time, through wind, rain or shine

## Veosys

The stainless steel hinge for the New Zealand outdoors. Its stainless steel finish makes the Veosys hinge from Hettich a robust all rounder. Not affected by temperature fluctuations and moisture, Veosys comes with tested resistance to corrosion. With Hettich's integrated Silent System, the soft-closing functionality keeps working over a broad temperature range. And with its uniquely wide self closing angle of 35°, Veosys closes doors almost by itself.

## Quadro Compact

Ball bearings are one the world's success stories. High-performance and precision machines would be unthinkable without them. Ball bearings are precision components that deliver the smoothest possible action and enjoy an extremely long life. And they are virtually indestructible, coping with big temperature fluctuations and tremendous loads. Quadro Compact runners have a loading capacity of 40 kg and is available in soft closing and push to open.

## InnoTech Atira

The InnoTech Atira drawer system by Hettich is designed with the potential for individual creativity in mind. With a focus on the systems sharp contours.

The system features anthracite in the Outdoor Alfresco Kitchen Collection with a range of side element heights of 70mm, 144mm & 176mm.
